## PROFESSIONAL EXPERIENCE

Feb '22 – present    Full Stack Developer – Teleperformance Portugal

- Implemented **Azure Cloud Services**, including Web Apps, for scalable and reliable application infrastructure.
- **Led** a team in automating a manual process, improving efficiency, and reducing errors.
- Developed **RESTful APIs** for backend services, as well as frontend components for seamless user experiences.
- Implemented **Azure DevOps** for creating and managing **CI/CD** pipelines.
- Utilized **JWT Tokens** for API and webpage authorization/authentication.
- **Planned** and **distributed** tasks for timely project delivery.
- Collaborated with different teams to manage project dependencies and achieve project goals within deadlines.
- **Designed** and implemented a solution to migrate non Azure applications to Azure AD authentication using **OpenID** and **SAML** protocols.
- Automated End-to-End testing using **Cypress** for high code quality.
- Created an authentication design for a Chrome extension, addressing clean desk policy scenarios and 2FA restrictions.
- Took responsibility for deploying to **DEV**, **UAT**, and **PROD** environments, ensuring smooth transitions, and provided comprehensive documentation.
- Methodology: **Agile Scrum**.

## EDUCATION

Sep '16 – Sep '21    NOVA School of Science and Technology | FCT NOVA

- **Master's Degree in Computer Science**
